

MANGESH GOSAVI

Software Developer

8879577847 | mangeshgosavi32@gmail.com | <https://myportfolio-black-theta.vercel.app>

PROFESSIONAL SUMMARY

- Passionate and solutions-driven Software Developer with 9 months of hands-on experience in end-to-end web application development, including REST APIs, and multi-tenant platform architecture.
- Proven track record in fast-paced, multi-client environments, collaborating with cross-functional teams to deliver high-quality features using Angular, React.js, Node.js, TypeScript, and Python.
- Bug resolver for resolving production bugs across live deployments, improving platform stability, and maintaining code quality through structured debugging and consistent documentation practices.
- Quick to learn and adapt to new technologies, with hands-on exposure to Keycloak SSO, VM deployment with PM2, OTP verification flows, and data migration pipelines — contributing across all phases of the software development lifecycle.

WORK EXPERIENCE

Junior Software Developer

OCT 2025 - MAR 2026 – (6 months)

Full-Time | Mumbai, India

Unified Platform & Multi-Tenant Architecture

- Architected and implemented a multi-tenant, role-based Unified platform serving Student, Admin, and Super Admin portals with secure Auth Guards and Keycloak-based authentication.
- Designed and developed an Agent Registration module enabling agents to register students, manage applications, and track payment status with dedicated dashboards. And also added an Agent view for the Admin side.
- Built a dynamic onboarding configuration system including service-level logo management, authority details, delivery type configuration, and payment setup with full validation.

Feature Development

- Implemented dynamic form rendering with sequence-based field ordering, conditional visibility by document/delivery type, and real-time tab unlock logic tied to education completion.
- Developed a PDF and Excel generation engine for multiple document types including Transcripts, ID Cards, Result Books, Registration Sheets, and Aveshanbook reports.
- Integrated OTP verification end-to-end, added user verification status logic to block unauthorized users, and admin-side validation.
- Built an errata re-upload workflow with document-level upload/delete controls, confirmation popups, and status tracking for TC, Migration, and PDC services.
- In Tc and Migration service added a logic to block users from filling the form without filling extra details required for the service.
- Improved the UI of the student side and admin side to make it user friendly and responsive.

Cross-Client Bug Fixes & Deployments

- Resolved production bugs across HSNC, Xavier, Raheja, and Unified platforms — including PDF alignment, marks pattern validation, pagination errors, incorrect marksheet form rendering and dropdown/search issues.
- Led VM deployments for Raheja and Xavier from scratch using PM2, managed file system backups, project migration, and maintained live environments.

Data Migration & Performance

- Engineered a user-wise, tenant-wise data migration pipeline resolving ID continuity issues, creating missing Keycloak users, and syncing education and document records to the database.
- Implemented dynamic loaders (Library, Certificate, Puzzle, Cloud Sync, University) tailored per route/task to improve perceived performance and UX consistency.

Junior Software Developer Intern

Internship | Mumbai, India

JAN 2025 – MAR 2025 (3 months)

Dashboard & Scheduling

- Created a Test Scheduling section to assign tests to students.
- Developed a complete Student Dashboard including Student Report, Result Chart, Bookmarked Questions, Reports, Scheduled Tests, and a Test Paper module.

Test Paper Module

- Implemented auto-pause timer when offline, cheat detection via tabswitch monitoring, and shuffled questions per student with support for both image and text-based questions.
- Used automation to mark tests as active and completed; added pie chart interaction to display solutions on click.

Reporting & Organisation

- Categorized bookmarked questions chapter-wise and displayed attempted test issues in the Report section.

PROJECTS

Test Series Website (Live)	MySQL, React, Python, Django
Shopping Website (Live)	MySQL, Express, React, Node.js, Python
Freedom – Blog Website (Live)	Express, React, Node.js, Tailwind, MongoDB
Blockchain Supplychain	HTML, CSS, Python, Flask
TrendsTweet – Web Scraping Automation	Python
Image Analytics	Python
Auction Platform	HTML, Tailwind, JavaScript

EDUCATION

Master in Information Technology (2025)

Ramnarin Ruia College CGPA: 7.25

Graduation (2023)

Patkar Varde College CGPA: 8.75

SSC – Maharashtra State Board (2018)

Indian Education Society Charkop (IES) Percentage: 81%

TECHNICAL SKILLS

Languages:	JavaScript, TypeScript, Python, HTML5, CSS3
Frontend:	Angular, React.js, Tailwind CSS, Bootstrap
Backend:	Node.js, Express.js, Django, Flask, REST APIs
Databases:	MySQL, MongoDB, SQL
Tools:	Git, Figma, Postman
Python Libraries:	Pandas, Matplotlib, NumPy

CERTIFICATIONS

- SQL – Simplilearn
- Python Libraries for Data Science – Simplilearn

LANGUAGES

English | Hindi | Marathi
